

# MARSHALLS ENERGY COMPANY Inc.

## VACANCY ANNOUNCEMENT

Opening Date: May 1<sup>st</sup> 2008. Closing Date: Until position is filled.

### Position.

## Senior Power Plant / Distribution Electrician

### Salary.

US\$ package dependent upon Qualifications and Experience

### Location.

Majuro Atoll, Republic of the Marshall Islands.

### Company info.

Marshalls Energy Company Inc.(MEC).

MEC is a unique utility company with an annual turnover of US\$50+million, headquartered on Majuro Atoll. The corporation controls six power plants ranging in size from 75kW to 13MW located on 5 different islands while providing support services to three small power plants on other islands. Additionally MEC oversees the operation of the various water and sewer operations located on several islands along with a nationwide renewable energy program covering 27 atolls spread over two million square miles of ocean.

### Duties and Responsibilities.

- Under the general direction of the Manager of MEC, the power plant electrician will assist and oversee the charge and control of the operation and maintenance of all electrical operations from generation to distribution of power and assist with water, sewer, fuel terminal facilities, renewable energy operations of the combined utilities. These duties will entail some local travel to the various islands within the country.
- Implement policies, rules, and regulations of the corporation
- Develop and implement necessary training programs for local staff
- Maintain, control and further develop maintenance procedures for all operations
- Perform other duties or projects as required or as assigned by management.

### Qualifications.

A Minimum of 10 yrs experience in similar industry work is essential and with experience in isolated locations is preferable. A Degree in Electrical Engineering or any combination of equivalent experience deemed appropriate by management. We operate a US spec power system, 13800kVA mains down through 120 VAC @ 60hz utilizing both overhead and underground systems to the US National Electric Code (NEC). An understanding of control room instrumentation operation and repair is also required.

# **MARSHALLS ENERGY COMPANY Inc.**

## **VACANCY ANNOUNCEMENT**

Opening Date: May 1<sup>st</sup> 2008. Closing Date: Until position is filled.

### **Position.**

## **Water / Sewer Engineer**

### **Salary.**

US\$ package dependent upon Qualifications and Experience

### **Location.**

Majuro Atoll, Republic of the Marshall Islands.

### **Company info.**

Marshalls Energy Company Inc.(MEC).

MEC is a unique utility company with an annual turnover of US\$50+million, headquartered on Majuro Atoll. The corporation controls six power plants located on 5 different islands and oversees the operation of the various water and sewer operations located on several islands. The company has a combined collected storage capacity of 36 million gals and operates various R/O units to 200,000 gpd capacity with distributed fresh and saltwater systems. Collected and septic sewer systems are operated with minor treatment systems and outfalls. All are in need of engineering design and repair.

### **Duties and Responsibilities.**

- Under the general direction of the General Manager of MEC, the Water Engineer will assist and oversee the charge and control of the operation and maintenance of all water and sewer operations of the combined utilities. Primarily responsibility will be to upgrade the existing systems which have started to fail. These duties will entail some local travel to the various islands within the country.
- Implement policies, rules, and regulations of the corporation
- Develop and implement necessary training programs for local staff
- Maintain, control and further develop maintenance procedures for all operations in association with electrical, mechanical and operation staff.
