

The Marshalls Energy Company is seeking applications for the position of Mechanical Engineer to be based in the Marshall Islands, in the central Pacific Ocean.

Major duties will include but not be limited to:

- Maintenance, fault finding and repairs in our power plants
- Responsible for generator maintenance contracts
- Responsible for the training and certification of local staff
- Responsible for operational efficiencies of power plant systems.

The successful applicant must possess appropriate internationally recognized certification/qualifications compliant with the operation and maintenance of diesel fueled power plants operating multiple engines rated from 50hp to 10,000hp for each engine. Applicant must have a minimum of 5 years experience as a service engineer with a major diesel engine manufacturer/supplier and a minimum of 10 years experience with generating systems utilizing 5,000hp to 10,000hp engines. The applicant must be capable of carrying out hands-on servicing and rebuilding of engines manufactured by Peilstik, Deutz, Catapillar, Wartsila etc.

Applicant should also have a basic knowledge in computing skills in Excel, Word and emailing etc.

Salary will be commensurate with the applicant's experience.

Resumes and references should be forwarded to Marshalls Energy Company, PO Box 1439, Majuro, Marshall Islands, MH96960, for the attention of the General Manager, or alternately emailed to meccorp@ntamar.net and should be received no later than June 15th @5pm.
