

Approval Granted For NZ's Biggest Wind Farm

New Zealand's biggest wind farm has gained final approval to begin construction. The NZ\$350 million 220 MW wind farm will be built on 3000 ha of land 45 km north west of Napier. The Environment Court approved in July the Hawke's Bay Wind Farm's plan to build a 75-turbine farm with the condition that it made modifications to avoid wind turbulence with an adjoining 42-turbine wind farm.
