- Adviser Remuneration Framework (ARF) – C4 **\$12, 545 - \$15,682 p/month**
- 12 month role
- Based in Kiribati

The role

Ministry of Infrastructure and Sustainable Energy (MISE) was established by the Government to primary handle engineering work that includes, infrastructural and energy services. The demand need of engineering services overwhelm the MISE capacities to accommodate the increasing in population on such a small land space in associated with the impact of climate change such as sea level rising, drought for some session, otherwise heavy rainfall.

MISE is requesting the services engineering support, especially on civil engineering field to assist with Civil Engineering Unit (CEU) within MISE to improve design and construction of infrastructural development except on buildings.

You will be accountable to, and managed by Director, Engineering Services.

This role is expected to commence in July for a period of 12 months.

Key objectives:

- Ensure the successful design and implementation of the civil engineering projects especially on roads and bridges
- Lead MISE supervision of the civil activities
- Quality Assurance
- Mentoring MISE staff skills in planning, design, procuring, managing and implementing engineering work for civil infrastructure
- Cross-cutting issues

Selection criteria:

Qualifications

- Tertiary Degree in Civil engineering or BSc in Civil Engineering;
- Basic first aid certificate

Skills, experience, knowledge

- Minimum 10 years of relevant professional experience in infrastructure project preparation and management, civil works including detailed design and supervision;
- Good understanding of national regulations pertaining to the environment, communal services and procurement through government agencies;
- Good knowledge of the relevant design norms and construction legislation;
- Proven ability to build relationship and rapport with all levels of staff, and work as part of the team in a developing country office environment, and to provide advice, mentoring and training to colleagues

Desirable

- Knowledge and experience of construction using coral sands and construction methods requiring significant manual input and direct supervision control.
- Previous experience with construction and maintenance of coastal protection systems.
- Previous experience in developing countries on similar assignments, particularly working in Kiribati, will be an advantage.
- Knowledge of and experience with topographical survey by drone technology will be well regarded
- Certificate IV in Training and Assessment and/or relevant equivalent experience

The benefits:

- Remuneration in line with the ARF – C4 **\$12, 545 - \$15,682 p/month**
- Mobility and special location allowances
- Flights, medicals, and insurance
- Pre-departure briefing and in-country orientation
- Ongoing assignment monitoring and support

Scope Global – Engaged in the present to develop the future

Scope Global is a specialist project management company with people as the focus of its program delivery. We have a history of successfully managing projects in the international development and international education sectors.

The Pacific Technical Assistance Mechanism Phase 2 (PACTAM2) is an Australian Government initiative, funded through the Australian aid program and managed by Scope Global. It places highly skilled Advisers with Partner Governments in participating Pacific Island countries to build capacity and to meet identified human resource needs. If you are interested in other PACTAM2 opportunities and would like to receive updates, please [register your interest](#).
