28.3 Notwithstanding ITT 28.2, from the time of tender opening to the time of Contract Award, if any Tenderer wishes to contact the Purchaser on any matter related to the tendering process, it should do so in writing.

### **Clarification of Tenders**

request in writing from any Tenderer clarification of its Tender. Any clarification submitted by a Tenderer in respect to its Tender that is not in response to a request by the Purchaser or if a Tenderer does not provide clarification as requested by the Purchaser, the tender shall not be considered and rejected. The Purchaser's request for clarification and the response shall be in writing. No change in the prices or substance of the Tender shall be sought, offered, or permitted, except to confirm the correction of arithmetic errors discovered by the Purchaser in the evaluation of the Tenders in accordance with ITT 31. Any variation of price as a result of tax issues must be referred back to the Tenders Board for approval.

**Responsiveness  
of Tenders**

- 30.1 The Purchaser's determination of a tender's responsiveness is to be based on the contents of the tender itself.
- 30.2 A substantially responsive Tender is one that conforms to all the terms, conditions, and specifications of the Tender Documents without material deviation, reservation, or omission. A material deviation, reservation, or omission is one that:
- (a) affects in any substantial way the scope, quality, or performance of the Goods and Related Services specified in the Contract; or

documentation requirements. The Purchaser's request should only be for purpose of seeking clarification and not result in disqualification of a tender. Such omission shall not be related to any aspect of the price of the Tender. Failure of the Tenderer to comply with the request may result in the rejection of its Tender.

31.3 Provided that the Tender is substantially responsive, the Purchaser shall correct arithmetical errors on the following basis:

- (a) if there is a discrepancy between the unit price and the line item total that is obtained by multiplying the unit price by the quantity, the unit price shall prevail and the line item total shall be corrected, unless in the opinion of the Purchaser there is an obvious misplacement of the decimal point in the unit price, in which case the line item total as quoted shall govern and the unit price shall be corrected;
- (b) if there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail and the total shall be corrected; and
- (c) if there is a discrepancy between words and figures, the amount in words shall prevail, unless the amount expressed in words is related to an arithmetic error, in which case the amount in figures shall prevail subject to (a) and (b) above.

31.4 If the Tenderer that submitted the lowest evaluated Tender does not accept the correction of errors, its Tender shall be rejected at the discretion of the Purchaser.

**Preliminary  
Examination of  
Tenders**

32.1 The Purchaser shall examine the Tenders to confirm that all documents and technical documentation requested in ITT 11 have been provided and to determine the completeness of each Tender submitted.

### 3. Technical Specifications

#### **Background – Specification Preparation Objectives**

*The purpose of the Technical Specifications (“TS”) is to define the technical characteristics of the Goods and Related Services required by the Purchaser. The Purchaser shall prepare the detailed TS take into account that:*

- *The TS constitute the benchmarks against which the Purchaser will verify the technical responsiveness of tenders and subsequently evaluate the tenders. Therefore, well-defined TS will facilitate preparation of responsive tenders by Tenderers, as well as examination, evaluation, and comparison of the tenders by the Purchaser.*
- *The TS shall require that all goods and materials to be incorporated in the goods be **new, unused, and of the most recent or current models**, and that they **incorporate all recent improvements in design and materials**, unless provided for otherwise in the contract.*
- *The TS shall make use of best practices and proven performers. Samples of specifications from successful similar procurements in the same country or sector may provide a sound basis for drafting the TS.*
- *The Government encourages the use of metric units.*
- *Standardizing technical specifications may be advantageous, depending on the complexity of the goods and the repetitiveness of the type of procurement. Technical Specifications should be broad enough to avoid restrictions on workmanship, materials, and equipment commonly used in manufacturing similar kinds of goods.*
- *Standards for equipment, materials, and workmanship specified in the Tendering Documents shall not be restrictive. Recognized international standards should be specified as much as possible. Reference to brand names, catalogue numbers, or other details that limit any materials or items to a specific manufacturer should be avoided as far as possible. Where unavoidable, such item description should always be followed by the words “or substantially equivalent.” When other particular standards or codes of practice are referred to in the TS, whether from the Government of Samoa’s or from other eligible countries, a statement should follow other authoritative standards that ensure at least a substantially equal quality, then the standards mentioned in the TS will also be acceptable.*
- *Reference to brand names and catalogue numbers should be avoided as far as possible; where unavoidable the words “or at least equivalent” shall always follow such references.*
- *The TS shall be fully descriptive of the requirements in respect of, but not limited to, the following:*

- (a) *Standards of materials and workmanship required for the production and manufacturing of the Goods.*
  - (b) *Detailed tests required (type and number).*
  - (c) *Other additional work and/or Related Services required to achieve full delivery, completion and successful commissioning*
  - (d) *Detailed activities to be performed by the Supplier, and associated participation of the Purchaser*
  - (e) *List of detailed functional guarantees covered by the Warranty and the specification of the liquidated damages to be applied in the event that such guarantees are not met.*
- *The TS shall specify all essential technical and performance characteristics and requirements, including guaranteed or acceptable maximum or minimum values, as appropriate. Whenever necessary, the Purchaser shall include an additional ad-hoc tendering form (to be an Attachment to the Tender Submission Sheet), where the Tenderer shall provide detailed information on such technical performance characteristics in respect to the corresponding acceptable or guaranteed values.*
  - *When the Purchaser requests that the Tenderer provides in its tender a part or all of the Technical Specifications, technical schedules, or other technical information, the Purchaser shall specify in detail the nature and extent of the required information and the manner in which it has to be presented by the Tenderer in its tender, particularly manufacturer technical specifications, application guidelines and performance data*
  - *REFER TO **SPECIFICATIONS COMPLIANCE SCHEDULE FOLLOWING**, which in dot-point form which should enable preparation of logically sequenced, well-structured specifications which can be easily and thoroughly assessed for compliance*

## **PURCHASER/PURCHASER REQUIREMENTS**

### **BACKGROUND**

EPC system reliability is greatly affected by unreliability of distribution feeders. Also affected by lightning strikes with direct hits on power stations like January strike on Fiaga power station. Fast growing vegetation on powerlines is main cause of feeder outages.

EPC installed Automatic Transfer Switch to provide a high reliability of power supply to hospital. Two distribution feeders; Hospital Feeder from Tanugamanono power station and Palisi Feeder from Fuluasou Substation are both connected to main hospitals using the ATS. Hospital feeder, which is underground, is primary feed to hospital. Palisi feeder is backup

feeder. Then there is standby generators in hospital to provide back up if both feeders are off.

### **SYSTEM RELIABILITY**

EPC is experiencing a lot of feeder outages especially on Lefaga Feeder, Palisi Feeder, and South Coast Feeder. A lot of problems is vegetation touching powerlines especially on tee-off taplines. Most of these faults are transient in nature. All laterals and taplines are 3 phases. EPC needs Tripsaver II devices, single phase, replaces use of cutouts, manufactured by S&C Electric Co or other manufacturers which will trip and reclose if fault is cleared.

### **SPECIFICATION OF EQUIPMENT TO BE SUPPLIED**

The 4 equipment to be supplied and installed are:

- 1) Automatic Transfer Switches
- 2) Auto Recloser Switch
- 3) TripSaver II
- 4) Underground Cable Fault Distance Locator

#### **1) 22kV AUTOMATIC TRANSFER SWITCH (ATS)**

Two (2) ATS are presently being used in EPC network. One on main power supply to main hospital in Apia and other on power supply to Government Main Office building and Central Bank building. One of the two new ATS to be supplied will also be installed at main hospital to feed other part of the hospital. Two 22kv feeders (Hospital Feeder and Beach Road Feeders) will be connected to ATS. Hospital feeder being the primary feeder and Beach Road Feeder as back up before standby generator kicks in if both feeders trip. ATS controls should be programmed for transfer to backup feeder and returned to normal setting when primary feeder is back on. Existing ATS are both Schneider make and we prefer that same to be supplied and installed. Include with AR is a radio or cell phone link to be controlled from National Control Center remotely.

#### **2) Auto Reclosers Switch - NOVA 38kV Recloser with SEL651R controller**

EPC has 4 AR installed on Upolu network and 1 in Savaii network. AR are rated at 22-25KV. AR will be programmed to coordinate trip settings with feeder circuit breaker in substations. There shall be 2 trips and lockout if fault is not cleared. AR will be pole mounted. Include with AR is a radio or cell phone link to be controlled from National Control Center remotely. Supplier to carry out tests to know best line of site for good communications between NCC and AR.

- Polemount Switchgear Recloser: NOVA
- Recloser Controller: SEL651R

- Communication: Cellular (Modem Dual Sim Card)
- 19 pin 30ft(9m) control cable (note, the NOVA recloser will be supplied with a 30ft voltage sensing cable).
- NOVA Front Mount pole hanger (see drawing attached)
- Surge arresters – for 22kV application we propose Cooper Evolution Surges arresters rated 18kV which have a temporary over-voltage rating of  $1.78 \times (\text{MCOV}) 15.3 \text{ kV} = 27.23 \text{ kV}$  (Line to ground) (See catalogue section and brochure attached).

### 3) TripSaver II – Cut Out Mounted Recloser

Cut Out Mounted Recloser preferably Trip Saver II product by S&C. Shall be an outdoor, single pole, self-powered, recloser incorporating a vacuum fault interrupter, that includes a microprocessor control, with an integral data transceiver and an integral fault-current sensor. The Cut Out Recloser shall be configurable and able to mimic the operation of a Normal Cut Out Fuse. This product will be installed on T-branches of Distribution Network that shall protect network from tripping improving network reliability. Cut Out Recloser shall be configurable with comprehensive selections of fuses and reclosing curves. Must also include communication gateway with back-up battery.
