

**PACIFIC POWER
ASSOCIATION**

MEMBERS DIRECTORY 2021

Message from the Acting Executive Director

The Secretariat is pleased to issue the 2021 PPA Directory.

The Secretariat publishes each year a comprehensive directory for the benefit of its members. This directory provides members with all the necessary information to allow close contact and networking between both Active and Allied Members.

For the Allied Members, the directory provides the contact details of the CEOs, managers, engineers and procurement officers of each of the power utilities.

For the power utilities, the directory provides the contact details of Allied Members together with a full-page advertisement outlining the equipment and services available from each Allied Member.

Also, the Index of Allied Members facilitates a quick and easy reference of equipment and services that the utilities may require together with those Allied Members that specialise in these areas.

Up to date information regarding any changes to Active or Allied members' details that occur after the publication of the directory can be obtained through access to the "back office" in our website at <http://www.ppa.org.fj>. The Secretariat will make these changes to the "back office" when notified by the members.

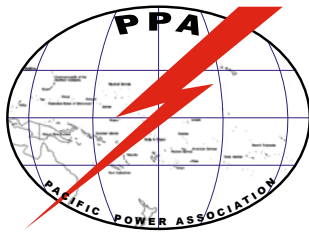

I recommend the use of this Directory by all members as this will provide valuable assistance to members with their core business activities during the course of this year.

With very best wishes for 2021 and for successful outcomes in your business dealings with the utilities.

Yours Sincerely,
Gordon J. Chang

CONTENTS

PPA Membership	4
Index of Active Members	5
Contact Information for Active Members	6-12
Index of Allied Members	13-15
Contact information for Allied Members	16-23

MISSION

"To support the Pacific Islands Country and Territory (PICT) power utilities in the provision of high quality, secure, efficient and sustainable electricity services."

VISION

Access to sustainable and quality electricity services for the people of the Pacific Islands Region.

Secretariat Head Office

Turbocharging Service Network. Service you can rely on in Australia, New Zealand, PNG and the South Pacific.

An ABB Turbocharging Service Station is always close by, wherever and whenever you need our support. Our highly qualified, experienced, ABB-trained engineers work at 100+ ABB-owned Service Stations in 50+ countries worldwide, 24/7. We know every one of the 200,000 ABB turbochargers in operation, and our stock availability is better than 98 %, even for the very oldest ABB models. So with our Turbocharging Service Network, you are sure of global premium support that ensures the optimum performance of your installation always. Get global coverage. www.abb.com/turbocharging

ACO Pits & Covers

Power & Water Utilities • Cable Management • Architectural

ACO is a leading Australian manufacturer of cable pits and continuous surface ducting systems for the electrical, communications and construction industries.

Benefits of the ACO Cablemate Range

- Product solutions for all load classes and applications
- A range of sizes to suit specific cable requirements and conduit entries
- The largest range of lids and access covers including anti-slip profiles
- PowerLok lids with standard or high security options
- SCEC approved products for high security applications
- Purpose designed and built pit bodies manufactured from materials with insulation for electrical resistivity
- ACO's EzyBrixx plastic product range enables size flexibility for pits and covers
- An extensive range of site accessories ensures trouble free installation
- ACO's Technical Services Department provides support to ensure the correct product is selected for the application and advice on installation

Rental power specialists in the Pacific Islands

No matter what industry you work in, you can depend on Aggreko to provide reliable power, quickly and affordably. From 20 kVA up to multi-megawatt packages, we provide turn-key service and flexible power tailored to your needs. With over 50 years' experience and the world's largest fleet of rental generators, our service team are on call 24/7 to ensure that you have the power, whenever and wherever you need it.

Storage GEM®

No more power outages!
3+ hours of Battery backup.

Solar GEM®

A solar plant plug and play
solution featuring
>74 kWp of solar capacity.

1 300 MW in operation and
under construction.

More than **60 plants** in operation or
under construction all across the world.

A strong track-records on islands:
Reunion Island, Corsica, Dominican
Republic, the **West Indies**, **New
Caledonia**, Indonesia, **Mauritius...**

SOLAR AND STORAGE GEM®

Akuo has developed the Solar GEM®, a **modular solar production mobile unit** and Storage GEM®, a **modular mobile storage unit**. Solar GEM® features more than **74 kWp** of solar capacity and Storage GEM® approximately **1 MWh** of battery storage **for more than 3 hours** of energy backup, each integrated in a **standard 20-foot shipping container**. Currently, more than **90 containers** are installed or ordered in Indonesia, Peru, Mauritius, Madagascar **and Tonga**.

STORAGE

A key area of expertise in the development of renewable energy, this technology has been fully mastered by Akuo, which was one of the first operators to deploy it on an industrial scale. **5 years of experience installing and operating** more than 30 MWh of li-ion battery systems combined with PV power plants.

A game-changer in the development of decentralized renewable energy, li-ion battery storage has been operated by Akuo also achieved today's Indonesia's largest **off-grid** Hybrid solution (Solar PV-Battery-Micro Hydro-Genset).

	Location	Capacity	Contract signature	Start of operation
Solar GEM®	Singapore	1 container / 74 kWp	2020	2020
	Mali	1 container / 74 kWp	2019	2020
	Indonesia	6 containers / 311 kWp	2017	2018
	Madagascar	44 containers / 3 256 kWp	2019	2020
	Dominican Republic	25 containers / 1 850 kWp	2018	2019
	TOTAL	77 containers / 5 565 kWp		
Storage GEM®	Martinique	6 containers / 20 MWh	2019	2020
	New Caledonia	1 container / 3 MWh	2020	2021
	Tonga 1*	3 containers / 5 MWh	2019	2020
	Tonga 2*	5 containers / 23 MWh	2019	2020
	Indonesia	3 containers / 2.1 MWh	2017	2018
	Mauritius	2 containers / 1 MWh	2018	2019
	Saint Vincent and Grenadines	1 container / 637kWh	2018	2019
	TOTAL	21 containers / 54.7MWh		

**Akuo is currently installing 2 Battery Energy Storage Systems in the Kingdom of Tonga using Storage GEM® products for more than 25 MWh for Grid stability and load-shifting purposes*

YOUR GLOBAL PARTNER FOR HYDRO SOLUTIONS

"FROM WATER-TO-WIRE"

HYDROPOWER GENERATION

ANDRITZ Hydro is a global leader of electro-mechanical equipment and services ("from water-to-wire") for hydropower plants. With over 175 years of experience and more than 32,000 turbines installed, we are constantly striving to create up-to-date technological innovations to meet our customer's

needs and requirements. Utility companies from all over the world value our know-how and commitment, and trust in the safety and reliability of our tailor-made energy generation solutions.

Our comprehensive product and service portfolio ranges from equipment for new, turnkey hydro-

power plants of all sizes to the refurbishing and overhaul of existing installations to comprehensive automation solutions.

Brilliant solutions...

With over 65 years of experience in design, engineering, manufacturing and electrical integration of enclosures, racks and cabinets, we are able to help our clients solve issues while minimising risk.

Our unrivalled industry and application knowledge means products and solutions are fit-for-purpose each and every time.

B&R's team of designers work with clients on unique engineering challenges to provide innovative, efficient solutions delivered with short-lead times and to complex project specifications.

Solutions and services range from off-the-shelf standard manufactured products, to customised and assembled-to-order solutions to electrical equipment integration, project management and supply chain management.

B&R's range of enclosure and cabinet solutions include:

- Power distribution
- Residential metering
- Commercial metering
- Junction & marshalling
- Process automation & control
- Motor control centres
- 19" networking & server cabinets
- Highly secure 19" cabinets
- Cooling systems for enclosures & cabinets
- Hazardous area electrical equipment
- Lighting control; and more

Renewable Energy Project Consultants

Global Sustainable Energy Solutions Pty Ltd (GSES), founded in 1998, offers extensive renewable energy consulting, engineering and training services on an international scale.

GSES has worked in over 30 countries worldwide, including throughout Australia, the Pacific region and Africa, for governments, aid organisations, NGOs, industry associations and businesses.

Project Management | Tender Preparation | Expert Training

GSES can provide system designs, prepare tender documents, train local electricians and project manage the installation of on- and off-grid renewable energy power systems using solar and hybrid technologies. Mitigate your business risk and overheads by taking advantage of GSES's engineering expertise. We have a representative located in Fiji designated at the Sustainable Energy Industry Association of the Pacific Islands (SEIAPI).

Computer-aided Design | Electrical Diagrams

GSES offers the following system designs, CAD and consulting services:

- Full system design calculations
- Single-line diagrams
- 2D system plan drawings
- Priced bill of materials
- Power production estimates
- Financial analysis
- Utility application and utility liaison
- Prepare documents technical tender
- Undertake tender evaluations
- Inspections of systems

Contact GSES on +61 2 9024 5312 or email info@gses.com.au for further details

GTS ARE THE LEADING INDEPENDENT PROVIDER OF SPARES AND SERVICES FOR INDUSTRIAL AND MARINE TURBOCHARGERS.

SPARES AVAILABILITY

Huge inventory - service kits, bearings, nozzle rings, rotor assemblies, casings & components.

FACTORY OVERHAUL

First class facilities, re-manufacturing expertise.

GTS support our clients anywhere in the world, our innovative service solutions, problem solving advice, quality spares and services, the highest levels of reliability, to keep your operational costs at a minimum.

Whenever you need support, no matter where Australia, Asia, Pacific region, our highly qualified, factory trained engineers, offer unmatched, unbiased technical support.

GTS ensures the optimum performance and efficiency of your installations.

FIELD SERVICES

Our experienced engineers, available for on site service and repairs, with 24/7 Technical Support.

BALANCING

Rotor assemble repairs, cleaning and balancing of rotating components.

New energy analytics platform - Launching 2021!

As efforts to decarbonise intensify around the world, energy transition is increasingly under the spotlight. For countries in the Pacific region, increasing the use of renewable energy mitigates climate-related risk and brings welcome relief from dependence on fossil fuels. Planning new renewable energy infrastructure is complex, Re-Sat puts a powerful tool in your hands.

Re-Sat is an advanced, online analytics platform which simplifies the pre-feasibility planning of new renewable generation capacity across a range of technologies including solar, wind and wave.

Designed for those involved in energy planning, project development and investment, Re-Sat brings together high-resolution resource maps with bespoke, state-of-the-art meteorological data and the ability to integrate geospatial information on relevant features such as the energy network, land use or protected areas.

Re-Sat's intuitive interface and workflow allow users to assess new renewable developments ranging from small-scale wind or solar farms through to complex, national-scale transition roadmaps combining both intermittent and dispatchable renewable technologies.

Through the use of probabilistic simulations of long-term, multi-year weather variability, Re-Sat reduces uncertainty and helps mitigate risk by providing detailed power data and statistics to analyse generation scenarios. These include:

- generation capacity and intermittency
- emission reductions
- fuel-related savings
- levelized cost of renewable generation
- generation vs demand
- residual load analysis

Metrics, charts, and analysis are downloadable for integration into reports and presentations to support robust investment cases and compelling, bankable project proposals.

Contact us today to learn more about how Re-Sat can save you time, money and effort in your renewable energy planning activities.

PPI

Power Protection
Industries

We provide electrical engineering, renewable energy, and high voltage installation, maintenance, testing and commissioning to the mining, power generation, agri-industrial utilities and manufacturing sectors in Australia and the Asia-Pacific.

FIND OUT MORE - PROTECHENERGY.COM.AU

ELECTRICAL ENGINEERING

We specialise in end to end delivery for power and energy systems, high voltage engineering, earthing systems, protection design and lightning protection. We provide complete design and project management package from inception to completion, throughout all voltage ranges.

RENEWABLE ENERGY

Our renewable energy service focuses on custom-designed solar solutions to meet each client's unique needs, saving money from the moment of installation. It is designed to be a long-term, tailored, green solution for the sustainable energy future of your business.

HV/LV MAINTENANCE

We offer a comprehensive range of end-to-end services including design, project management, construction, installation, commissioning, auditing, shutdown management, scheduled maintenance plans, and routine maintenance and testing.

Does your business need electrical engineering services, urgent maintenance or a reduced energy bill? Get in touch to arrange a quote.

Enabling Pacific Islands to achieve sustainable development

Ricardo provides support to island states in achieving sustainable systems which improve resilience, independence, and local island economies. We provide integrated cross-sector services specifically for islands, which include electricity infrastructure, local energy, transport, waste and resource management.

Our consulting services for sustainable development in island states covers a multitude of areas including:

- Energy policy and cross-sector strategy
- Development of enabling regulatory environments
- Integrated resource planning and clean power planning
- Feasibility studies and procurement support
- Licensing, standards, and processes for renewable energy
- Support for island power grid stability and resilience
- Smart networks, storage, and demand side management
- Electromobility strategy, planning and deployment
- Energy strategy, planning and implementation for airports and ports
- Development of local energy solutions for commercial and industrial sites
- Waste to energy across multiple feedstocks
- Circular economy and resource management
- Models for regional harmonisation and cooperation
- Capacity strengthening and skills development
- Development and implementation of Nationally Determined Contributions (NDCs) and long-term low emission strategies (LT-LEDS)

Read more about Ricardo, our services and the islands we have supported:

For more information on Ricardo's sustainable island support services, please contact us at enquiry-ee@ricardo.com or **+44 (0)1235 753000**

Two Results. One Solution.

Lower your truck roll costs.

How often are you sending trucks out to lateral lines to replace blown fuses? Each of those dispatches eats into your operations budget.

**Put that budget
to better use.**

Reduce customer outages.

Over 80% of faults occur on lateral lines. Every outage impacts your customers, your call centre, and your bottom line.

**It's time you change
your protection
strategy.**

Reduce truck rolls **and** customer outages with
TripSaver® II Cutout-Mounted Reclosers

SMA Energy System. Install with confidence.

Why install SMA?

- **#1** European PV inverter manufacturer brand¹
- **40** years' experience
- **100%** tested to ensure quality and reliability
- **90GW+** of installed SMA inverter power worldwide help prevent 59 million tons of CO₂ emissions each year.
- **>190** countries are shaping the energy transition with SMA

Easy, cost-effective and convenient. Save on solar with SMA Energy Systems.

SMA enables you to provide the right energy system to suit individual needs.

The modular design makes getting started easy with solar generation. For more efficient solar use, add a storage system, or intelligent energy management. In the future, integrate e-mobility, heat with solar, and even sell your solar.

Building paths towards a 100% renewable energy future

The energy landscape is in transition towards more flexible and sustainable energy systems. We envision a 100% renewable energy future. Wärtsilä is leading the transition as the Energy System Integrator – we understand, design, build and serve optimal power systems for future generations. Engines and storage will provide the needed flexibility to integrate renewables and secure reliability.
