TERMS OF REFERENCE

Consultancy to conduct gender equality, social inclusion, and rights-based analysis of the National Energy Frameworks in the Federated States of Micronesia, and Develop a GESI and Rights-based Integration Plan for EU- FSM SEAM REEE

A. Project Title and Background:

Sustainable Energy and Accompanying Measures (SEAM) in the Federated States of Micronesia (FSM) Renewable Energy and Energy Efficiency (SEAM REEE)

FSM is highly dependent on imported petroleum fuels. FSM annually spends approximately US\$50 million on fuel imports with most fuel used for electricity generation and transportation. Apart from Liquefied Petroleum Gas (LPG), virtually all petroleum products are supplied by FSM Petroleum Corporation (FSM Petrocorp) established by FSM Congress and signed into law in September 2007.

Electricity in the four States is generated and distributed by four independent utilities. These utilities are public State enterprises owned by the State governments. There is little to no participation of the private sector in energy generation in FSM, including through forms such as public-private partnerships, due to the lack of the necessary regulatory framework or the appropriate incentives.

FSM has developed policies and plans and establishing and strengthening National and State institutions with mandates for managing climate and related risks, including disaster risk management. The Nationwide Climate Change Policy, the National Energy Policy-2012 and State Energy Action Plans, National Action Plan to Combat Land Degradation, Nationally Determined Contributions (NDCs) (under the Paris Agreement FSM committed to unconditionally reduce emissions by 28% by 2025), and the recently endorsed FSM Gender Policy (2018). There are several National and State-level plans and policies that FSM is attempting to implement to address major threats to the sustainability and, economic and social viability of the country.

FSM Energy Master Plan noted issues relating to the disparity in accessing electricity by urban and those living in outer islands. In response, the Master Plan outlined strategies to improve access to electricity such as 'State to pay the same tariff per kWh of electricity based on an assumed level of electricity consumption, regardless of their location, and inclusion of household wiring into the cost of the electrification roll-out, enabling poorer households to repay such costs over time.' National and State social assessments that were conducted to inform the Master Plan also highlighted the needs of women and men in outer islands such as women favouring streetlights for safety and access to electricity to reduce time taken to do household chores and improve health outcomes while men prefer refrigerators and freezers.

The FSM SEAM REEE project is a five- year project funded under the EDF 11 support to the FSM Government. The Pacific Community (SPC) is the Implementing agency of the Project in partnership with the FSM National Government.

The overall objective of the FSM SEAM REEE Action is to improve enable the FSM population to utilize affordable, reliable, and environmentally sound energy services and benefit from transparent and efficient management of public funds, and upgrade social and economic development for better livelihoods in FSM. This will be facilitated through a reform of the energy sector which will consider policy reviews to better align towards FSM Sustainable Development Goal No. 7 and NDCs, mainstreaming of gender and rights-based approach, legislating the sector in areas to promote independent regulation, having National and

State level energy investment plans, strengthened private sector participation, having standards for renewable energy and energy efficient equipment /appliances and, training and capacity building including utility management and Board of Directors. It is envisaged that through this project there will be increased access to renewable electricity and support private sector investment in energy efficiency and renewable energy.

Project activities will contribute to the continued cooperation to improve national ownership and enhance engagement of all actors. The project will also lead to increased access to affordable energy services for the population, including in the remote islands, through increased use of renewable sources for the generation of electricity, improved energy efficiency, inclusive of CSO (and women and youth groups) participation and, targeted training. These efforts will also strengthen the governance structure of the sector at the national and state levels and build partnerships.

FSM government has committed to ensuring national development initiatives and investments are beneficial to all citizens regardless of social and economic status, gender, and cultural background. These commitments are highlighted in the Strategic Development Plan – Gender Strategic Plan goals, the Gender Policy 2018, and Youth Policy 2017-2023. These commitments emphasized inclusion and empowerment of women, youth, senior citizens, and people with disabilities in planning, implementation, monitoring and governance of national development initiatives. In addition to these national commitments, FSM government is a state party to the Convention on the Rights of the Child (CRC), Convention on the Elimination of all forms of Discrimination Against Women (CEDAW) and the Convention on the Rights of Persons with Disability (CRPD). The Government is obliged to adhere to these Conventions by ensuring the rights of women, children and young people, and people with disability are promoted, protected, and fulfilled.

The Geo-resources and Energy Programme of the GEM Division has developed the Pacific Energy Gender Strategic Action Plan (PEG SAP) 2021 – 2030. The goal of PEGSAP is to “mainstream gender equality in the Pacific clean energy sector to empower women with increase career and income generating income opportunities and an enhanced access to clean energy.

22.2 The Contractor should notify SPC within fifteen (15) days of the occurrence of the force majeure event. The Contractor shall also notify SPC of any other changes in conditions or the occurrence of any event which interferes or threatens to interfere with its performance of this contract.

22.3 The notice shall include steps proposed by the Contractor to be taken, including any reasonable alternative means for performance that is not prevented by force majeure. On receipt of the notice required under this clause, SPC shall take such action as, in its sole discretion, it considers to be appropriate or necessary in the circumstances, including the granting to the Contractor of a reasonable extension of time in which to perform its obligations under this contract.

22.4 If the Contractor is rendered permanently unable, wholly or in part, by reason of force majeure to perform its obligations and meet its responsibilities under this contract, SPC shall have the right to suspend or terminate this contract on the same terms and conditions as are provided for in clause 23 "Termination", except that the period of notice shall be seven (7) days instead of thirty (30) days.

23. TERMINATION

23.1 Either party may terminate this contract for cause, in whole or in part, with fifteen (15) days' written notice to the other party. The initiation of arbitral proceedings in accordance with clause 24 "Settlement of Disputes" below shall not be deemed a termination of this contract.

23.2 SPC reserves the right to terminate without cause this contract, at any time with thirty (30) days written notice to the Contractor, in which case SPC shall reimburse the Contractor for all reasonable costs incurred by the Contractor prior to receipt of the notice of termination.

23.3 In the event of any termination by SPC under this clause, no payment shall be due from SPC to the Contractor except for work and services satisfactorily performed in conformity with the express terms of this contract. The Contractor shall take immediate steps to terminate the work and services in a prompt and orderly manner and to minimise losses and further expenditure.

23.4 Should the Contractor be adjudged bankrupt, or be liquidated or become insolvent, or should the Contractor make an assignment for the benefit of its creditors, or should a receiver be appointed on account of the insolvency of the Contractor, SPC may, without prejudice to any other right or remedy it may have, terminate this contract forthwith. The Contractor shall immediately inform SPC of the occurrence of any of the above events.

24. SETTLEMENT OF DISPUTES

24.1 The Parties will use their best efforts to settle amicably any dispute, controversy or claim arising out of, or relating to this contract or the breach, termination or invalidity thereof.

24.2 If a dispute is not settled within sixty days of one Party notifying the other of a request for amicable settlement, the dispute can be referred by either Party to arbitration in accordance with the general principles of international law. The arbitration will be governed by the Arbitration Rules of the United Nations Commission on International Trade Law (UNCITRAL) as at present in force. The arbitral tribunal shall have no authority to award punitive damages. The Parties shall be bound by any arbitration award rendered as a result of such arbitration as the final adjudication of

any such controversy, claim or dispute.

25. PRIVILEGES AND IMMUNITIES

Nothing in or relating to this contract shall be deemed a waiver, express or implied, of any of the privileges and immunities of SPC.
