## REQUEST FOR QUOTATION

### RFQ No. ASPA 24.031 Transformers

### 3,000KVA, 34.5KV /13.2KV Pad-mounted Transformers

The American Samoa Power Authority desires to procure two 3,000KVA, 34.5KV / 13.2KV Pad-mount transformers.

Time is of the essence. Delivery time under 6 months is preferred.

#### Transformer Specifications:

- |                           |   |                                            |
|---------------------------|---|--------------------------------------------|
| 1. Transformer type       | - | Pad Mount                                  |
| 2. Bushings               | - | Loop, feed through.                        |
| 3. KVA Rating             | - | 3,000KVA                                   |
| 4. Voltage                | - | 34.5KV / 13.2KV                            |
| 5. Frequency              | - | 60 Hertz.                                  |
| 6. Vector Grouping        | - | Dyn11                                      |
| 7. Tap Changer type       | - | 34.5KV de-energized   13.2 KV off-load     |
| 8. Cooling                | - | ONAN                                       |
| 9. Coil Material          | - | Copper                                     |
| 10. Primary Fusing        | - | YES                                        |
| 11. Impedance             | - | Standard ANSI impedance.                   |
| 12. Bushing type          | - | Dead front, 35KV & 13.2KV elbow connection |
| 13. Radiator              | - | Hot dip galvanized, flanged connected      |
| 14. Terminal Interval Box | - | Stainless Steel                            |
| 15. Paint color           | - | Dark Green.                                |
| 16. Other                 | - | ANSI standards                             |

**Closing Date: 2:00 pm April 30. 2024 (A.S Time)**
