SOLICITATION OF INTEREST

The Guam Power Authority (GPA) is seeking interested contractors for complimentary Design-Build projects leading to the establishment of a new power substation in Mangilao, Guam to be referred to as Fadian Substation. One project is for the substation specifically and the other for the associated underground transmission lines that together would complete the plan.

The new substation design would be a copy of the Dededo Indoor Substation with anticipated variations due only to site specific conditions. The substations employ 5 breakers for the 35kV switchgear system, 4 breakers for the 15kV switchgear system and their associated 30mVA pad-mounted power transformer. The transmission lines are to be a looped system that re-routes lines between the Pulantat and Barrigada Substations at the Route 10 and Route 15 intersections and transits underground to the Fadian Substation Lot. Each transmission run consists of 6,500 feet x 6 each insulated 1000kcmil wires housed in concrete encased conduits. Total wire length is 2 runs x 6 each x 6,500 feet = 78,000 feet. Both projects have an end date of December 31, 2026.

Interested parties are requested to submit a letter of interest and statement of qualifications and business concept for the required services to include, but is not limited to: type of business, years of experience, etc.

Statement of Interest must be received by **4:00 P.M. ChST, June 30, 2025** and addressed to:

Mr. John M. Benavente, P.E., General Manager
c/o Jamie Lynn C. Pangelinan, Supply Management Administrator
Procurement Division
Gloria B. Nelson Public Service Building
688 Route 15
Mangilao, Guam 96913

Procurement instructions are posted on the Authority's web site at <https://notices.guam.gov>
